

NCS accelerates their growth with an exciting M&A as they build a leading IT hardware services firm

NCS Global, a leading global provider of IT hardware services and IT asset disposition services, announces its acquisition of Sturgeon Technologies.

Sturgeon, based in Atlanta, Georgia, offers extensive services, including ITAD, server deployment, value recovery, spare parts management, IT consulting, and data disposal. Sturgeon currently processes 25,000 devices per month in and out of their GA and CA facilities serving a customer base of over 150 clients (5 fortune 500 customers).

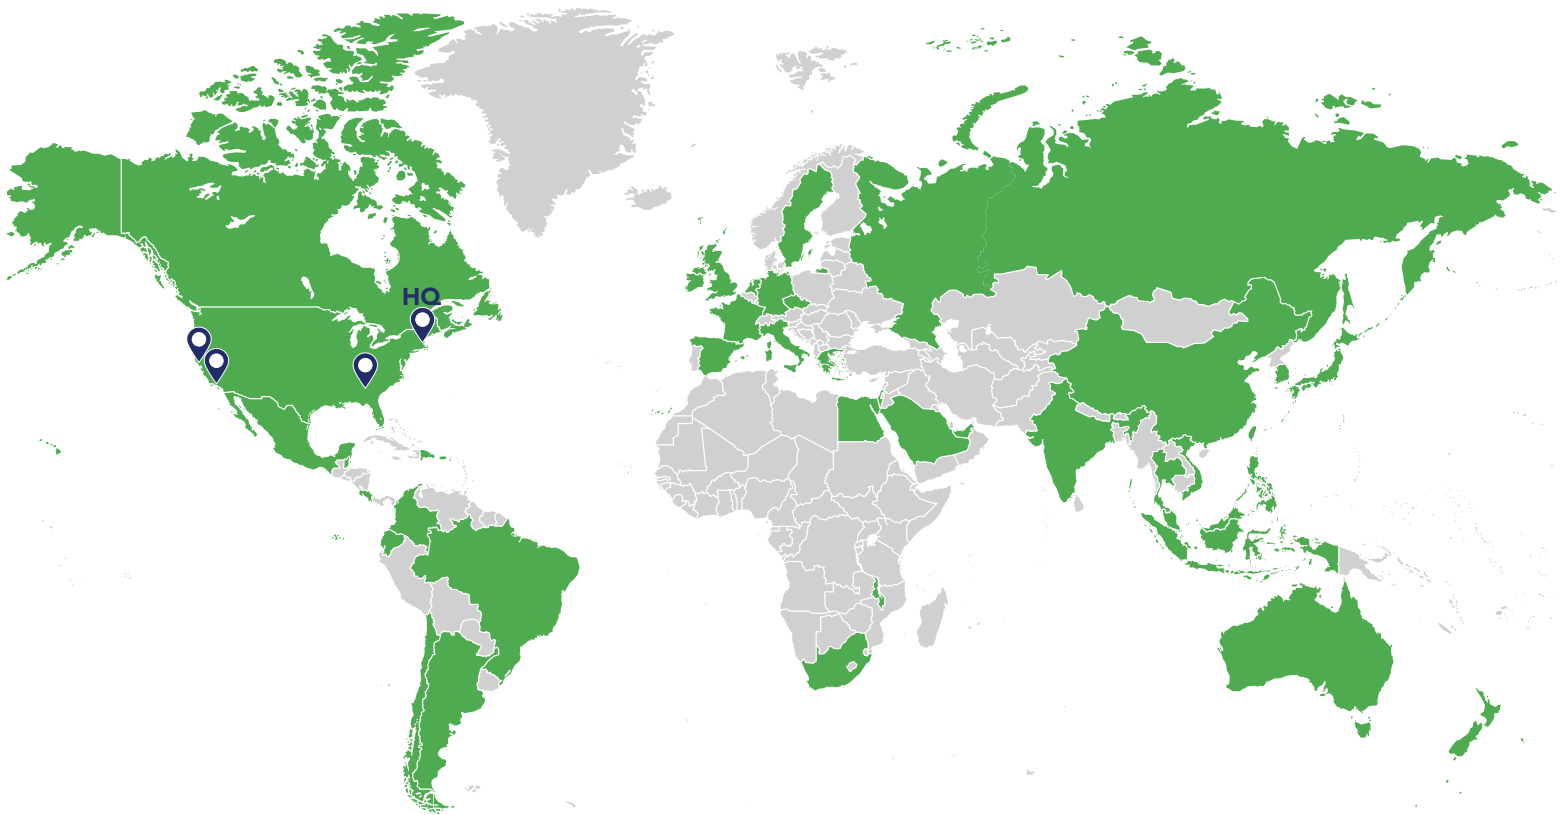

The acquisition of Sturgeon has expanded NCS Global's geographic footprint across the United States to the

Southeast and northern California, combining with legacy locations in New England and southern California.

BEST-IN-CLASS AND CERTIFIED PROCESSING FACILITIES

- NCS HQ: Rochester, NH
- NCS West: Los Angeles, CA
- Sturgeon: Atlanta, Georgia
- Sturgeon: San Jose, CA

NCS Global is proud to have a global reach, serving countries throughout the Americas, Europe, Africa, Asia, and beyond. [Click here](#) to explore site capabilities in the 35+ countries NCS Global is equipped to provide services to.

 NCS Global's Offices

JOINING FORCES FOR GOOD

// We are thrilled to add the team and facilities of Sturgeon to our already-strong teams in New Hampshire and California," said NCS Global executive Ross Porter. "We have tremendous capacity to serve new and existing clients in a broad range of industries beyond our traditional strongholds of data center operators, financial services, education, and healthcare. //

// Joining NCS is the right move for us both from a services standpoint and culturally," added Sturgeon founder Rachel Glaser Condon. "IT asset disposition companies should believe in their own practices enough to hold themselves accountable to the highest operational and sustainability standards, and we've found an acquiring partner who shares our values in leading our industry forward. //

EXPLORE THE EXPANDED SERVICE OFFERINGS

Before the acquisition of Sturgeon, NCS Global's solutions included:

- Pick/Pack Logistics
- Auditing and Screening
- Asset Recovery
- Testing, Validation, and Reporting
- Data Wiping and Degaussing
